Your Dental Insurance and Your Dental Appointments

Your Dental Insurance

The benefits provided by your dental insurance are determined by negotiations between your employer and the insurance company. This office has no say in the process. Actual benefits often have no correlation to your specific dental needs.

The dental treatment we recommend is based on what is best for you.

Our office deals with literally, hundreds of insurance plans. Every plan is unique. Some employers have multiple plans with changes in benefits regularly. It is impossible for us to know the details for each patient's plan.

For major treatment, such as crowns, bridges, root canals, and dentures we can file a pre-treatment estimate with your insurance carrier. This will provide a written estimate, outlining the coverage of your plan.

Routine or "basic" treatment such as cleanings, fillings, extractions, and x-rays do not require such estimates, and most insurance companies will not process them.

Upon request, we can print a "treatment plan" detailing your costs. This plan will include insurance procedure codes so that you can contact your carrier to determine your benefits.

Always keep in mind; the treatment we recommend is based on what is best for you and your dental health. The decisions your insurance company makes is based on what is best for them.

Ask us how to better understand your benefits and coverage!
